

EXPERIENCE

Warner Robinson is a leading national R&D tax credit consulting firm. Our Managing Directors Bruce Warner and Cedar Robinson have been focused on the R&D credit since the early 1990's. Much of Bruce and Cedar's experience has been dedicated to assisting large companies with R&D credits and significant involvement in IRS audits across many industries. Bruce is a former IRS attorney within their research credit team and Cedar's experience includes successful resolution of many R&D audits.

EXPERIENCE.
&
SERVICE.

SERVICE

The highest degree of customer service is paramount to our approach. Our Managing Directors, Cedar and Bruce, actively lead and manage each project with your goals and expectations in mind. Cedar or Bruce will be involved throughout each project including day-to-day management, all aspects of the implementation, reporting, and IRS defense. We also have an extensive team of professionals with large accounting firm and law firm backgrounds.

RETURN ON INVESTMENT

By leveraging our industry and IRS experience and developing a tailored approach based on your goals, Warner Robinson can help you:

- Maximize Federal and State R&D credits
- Identify new areas to claim R&D credits
- Utilize your internal and external resources effectively
- Quickly address and resolve tax technical issues
- Develop the best approach to key issues in IRS audits based on our audit experience

RETURN ON INVESTMENT.
&
VALUE.

VALUE

The Warner Robinson approach will help you create greater value for your company through our:

1. Highly experienced leaders and hands-on team to significantly reduce hours on projects.
2. Rates which are substantially lower than that of our Big Four competition. You receive a more experienced hands-on team at lower rates.
3. Industry and IRS experience. We will help you maximize your R&D credits and improve your sustained level of R&D credits during IRS audits.

About Warner Robinson LLC

Warner Robinson provides deep technical expertise in the area of R&D tax credits and other specialized federal and state tax credits and deductions. We believe that our key strength is the ability to leverage our IRS examination experience in developing the best strategy for your R&D study and documentation approach as well as in documenting and defending your R&D credits before the IRS (if necessary). Our experience can help your company take full advantage of available federal and state R&D credits and other incentives. Warner Robinson LLC is led by Managing Directors Cedar Robinson and Bruce Warner whose biographies and work experience are summarized below.

Cedar Robinson, Co-Founder & Managing Director

Cedar co-leads our R&D tax credit practice with over 26 years of R&D tax credit and tax consulting experience. His prior experience includes 11 years at PricewaterhouseCoopers LLP and 6 years as a Partner and R&D practice leader at Grant Thornton. Cedar's experience includes Fortune 1000 clients as well as a host of mid-size companies, start-ups and small businesses as well. In addition, Cedar's experience crosses all industries with emphasis on virtually all software and manufacturing sectors, plus financial services, engineering and architecture firms, energy, utilities, transportation and a variety of other industries. He also leads our Cost Segregation practice where he has practiced since 1996.

Bruce Warner, Co-Founder & Managing Director

Bruce co-leads our R&D tax credit practice. His career spans over 25 years as Tax Counsel to a Fortune 100 corporation, a former Principal and R&D practice leader with Deloitte, and as an IRS District Counsel attorney and co-counsel on the IRS Research Credit Issue Specialist team. Bruce worked full-time on R&D issues with the IRS Research Credit team and was on the government's trial team on two R&D credit cases, including the key Norwest Tax Court case involving software R&D. While with the IRS, Bruce also authored IRS coordinated issue papers and assisted in training IRS agents and IRS engineers throughout the country on the examination of R&D issues. Bruce's industry experience in R&D includes software development, manufacturing, government contractors, energy, media/entertainment and gaming.
